

试论湖南澧阳平原商时期考古遗存的发展阶段

豆海锋

(陕西 西安 710069)

摘要: 本文将湖南澧阳平原商时期遗存划分为皂市遗存与斑竹遗存两类,二者分别代表了两个不同的发展阶段。与周边同时期遗存比较,这种阶段性的特征与商文化对本地文化的冲击作用及两地文化的相互调适息息相关。

A Discussion on the Two Stages of the Archaeological Remains during Shang Dynasty in Liyang Plain, Hunan

Dou Haifeng

(Xi'an, Shaanxi 710069)

Abstract: Through the analysis of the archaeological sites found in the Liyang Plain dated to the Shang Dynasty, this paper divides the sites into two types, Zaoshi and Banzhu sites. Suggesting two separate developmental stages occurred during the Shang Dynasty. Moreover, by comparing with their surrounding sites dated to the same dynasty, the author believes that the formation of the two stages are interrelated with the impact of the Shang culture and the adjustment of local culture.

Keywords: Liyang Plain, the Middle Reaches of Yangtze River, Shang Dynasy, cultural interaction
